Just In: New Road-Mobile Missiles “Instrumental” for Army Strategy

Simi Valley, CA — New road-mobile missiles that are under development will fundamentally change the Army’s offensive capabilities, the head of the Service said December 7.

The types of systems in the works were previously banned under Intermediate-Range Nuclear Forces Treaty with Russia. The treaty was brokered in 1987 in the waning years of the Cold War. It prohibited the United States and Russia from deploying land-based nuclear or conventional missiles — both ballistic and cruise — with ranges of 500 to 5,500 km.

However, Washington accused Moscow of cheating, and the United States withdrew from the arms pact in August. The move made it possible for the Army to pursue road-mobile, conventional weapons with greater ranges that will be play an “instrumental” role in the Service’s multidomain operating concept, Secretary of the Army Ryan McCarthy told reporters at the Reagan National Defense Forum in Simi Valley. VOICE FROM THE COMMUNITY

Howard Berkof, U.S. Navy Unmanned Maritime Systems Program Office

I am responsible for planning, management, and integration of full-scale development, test, procurement, installation, and life-cycle support activities for numerous acquisition category (ACAT) and non-ACAT unmanned platform and payload programs. In addition, I have served in multiple roles in unmanned maritime vehicle acquisition during my 10 years of government service, and I have completed a 1-year assignment as a senior requirements analyst for the Expeditionary Warfare Division (N95) for the Chief of Naval Operations. I hold a B.S. in mechanical engineering from the Pennsylvania State University and an M.B.A. from Harvard Business School.

UPCOMING EVENTS

44th International Conference and Expo on Advanced Ceramics and Composites (ICACC 2020)
26 January 2020 to 31 January 2020

Autonomous Vehicles 2020
26 February 2020 to 28 February 2020

2020 Annual Directed Energy Science and Technology Symposium
9 March 2020 to 13 March 2020

2020 Army Aviation Mission Solutions Summit
22 April 2020 to 24 April 2020
